**Indian Institute of Information Technology Vadodara**
**Devansh Venkatesh Adhini**

## Education

**Indian Institute of Information Technology Vadodara** — **Aug 2023 – May 2027**
*B.Tech in Computer Science and Engineering* ***CPI: 8.60*** — *Diu, Gujarat, India*

**Indian Institute of Technology Ropar** — **Aug 2024 – Feb 2026**
*Major in Artificial Intelligence* — *Ropar, Punjab, India*

**Welspun Vidya Mandir** — **Apr 2022 – Mar 2023**
*Class XII (Higher Secondary) – CBSE* ***Percentage: 83.00%*** — *Anjar, Gujarat*

**Welspun Vidya Mandir** — **Apr 2020 – Mar 2021**
*Class X (Secondary) – CBSE* ***Percentage: 87.20%*** — *Anjar, Gujarat*

## Experience

**Goa Institute of Management** — **May 2026 – June 2026**
*Big Data Analytics / Researcher* — *Internship, Sanquelim, Goa*

- Co-authored to a first of its kind **ABDC A-grade** journal *Enterprises Information System*.
- Titled *"Trust, Security, and Privacy Challenges in Big Data-Driven **FinTech-as-a-Service** (FaaS): An Enterprise Integration Perspective"* Abstract.
- Conducted a systematic review of and synthesized research literature regarding FinTech-as-a-Service, Integrating as a Service to Enterprises, data privacy, security, and trust mechanisms within digital Financial Ecosystems.
- Evaluated emerging issues and trends in research for Big Data-driven Fintech solutions and assisted with the development of a comprehensive research framework and publication-ready manuscript.

## Projects

**Democratized Hierarchical Access Control using Edge Computing and Blockchain** |
*Web3.js, Solidity, Hyperledger Besu, Docker, KubeEdge* | GitHub

- Built a **distributed and decentralized** framework integrating edge computing with blockchain to enable secure, trustworthy and low-latency access validation across distributed nodes.
- Designed hierarchical access control mechanisms leveraging **smart contracts and edge node**.
- **Eliminated Single Point of Failure**.
- Conducting **ongoing research** on performance evaluation, scalability, and optimization of Edge–Blockchain architectures.
- Research Paper

**Decentralized Blockchain Banking System** |
*Solidity, React.js, Web3.js, Ethers.js, Brownie, Ganache* | GitHub

- A decentralized banking platform supporting staking, fixed deposits and smart-contract-based interest accrual.
- Integrated Web3.js and Ethers.js allowing the connection with the wallet and interaction with the blockchain.
- Created and validated smart contracts with Brownie and Ganache to ensure transparency in the financial transactions carried out.

**Why Did the Chicken Crossed the Road? A Visual Programming Language** |
*React.js, Blockly API, JavaScript, XML, Qwen LLM* | GitHub | Live Demo

- Built a Blockly-based visual programming platform with support for variables, loops, conditionals, and control flow.
- Integrated an **Agentic AI** assistant for coding and an **AI Agent** for platform guidance.

## Achievements

- Leetcode rating: **1812** rank: **68,564**
- CodeChef rating: **1583** rank: **17,740**
- **Finalist USAII** 2026 out of **808 Teams**.

## Technical Skills

- **Languages**: Python, Java, C++, C, SQL, MATLAB, Solidity, LateX
- **Core CS**: Data Structures & Algorithms, Operating Systems, DBMS, Computer Networks, Object Oriented Programming, Software Engineering, Automata, Cryptography
- **Frameworks & Libraries**: React, PyTorch, Pandas, Numpy, Selenium, Web3
- **Tools & Technologies**: Git, GitHub, Docker, Supabase, HyperLedger Besu, KubeEdge

## Volunteering/Administrative Role/Managerial Role

**Teaching Assistant** **Jan 2026 – April 2026**

*Discrete Mathematics* *IIIT-VICD, Diu*

- Conducted weekly tutorials and doubt solving sessions for a class of **140+ students**).
- Used more engineered and framework approach to solve Maths.
- Developed **AutoGrading**, **Attendance Management** and **Plagiarism Detection** using Infinite Monkey Theorem for academic workflow automation.
